Description

Model **2RC****** are rugged Radial Piston Double Pumps with 3, 5 or 7 pumping elements in each section of the pump. These pumps are valve controlled and there is no restriction on direction of rotation of the pump.

These pumps can be submerged in oil or externally mounted above oil level.

Pumps with model code **2RCE***** have extension shaft for through drive and are available with extension bracket assembly for coupling a pump having standard flange as per ISO 3019/1.

They are available with 84 flow combination and 7 pressure ratings.

These pumps give fixed output per revolution of the shaft.
